SUBJECT: Air Emissions Compliance Test Results Kuparuk River Unit -
Alaska Permit Nos. PSD-X82-01 and 8536-AA014

Dear Sirs:

Please find a copy of the NO_x compliance test 1985 report for the Kuparuk River Unit Oil Field Facilities. This year's testing included the Bohn Crude Oil Heater for the topping plant located at CPF-1. Testing occurred on September 6, 1985. The unit was tested by Petro Chem Environmental Services of Bakersfield, California. Neither the EPA nor ADEC sent a representative to witness the test.

If you have any questions on this report, please contact me (907) 263-4307.

Sincerely,

J. A. Ives
Area Director
Permits & Compliance
